

**Date:** November 22  
**Time:** 11:15AM CET  
**Location:** Paris, France  
*Presentation in French*

[See the full DMB Annual Conference program & register here](#)

**Learning objectives:**

Evolution in data management practices

Optimization of technological controls use

ePRO compliance metrics & responsibility of compliance between the site, patient, and technology in the new DCT model

**Abstract:**

Decentralized clinical trials seek to offer more flexibility to patients by allowing them to complete some clinical trial assessments from their own home. Technical innovations have given patients the ability to complete PROs from their own phone, computer, or via phone interview with trained site staff personnel when needed, but **how can we preserve data quality and meet compliance requirements with the high variability of data collection methods? How to face the increasing quantities of data collected and the rising complexity of regulatory standards?**

**Speakers:**

**Estelle Haenel**  
Medical Director @Kayentis

Aline Mistri  
Clinical Data Manager @Kayentis

**Want to learn more and discover our solution? Meet us at the DMB 25th Annual Conference!**
