

Kayentis

Global provider of eCOA and patient-centric solutions

Press release // OMRON Healthcare and Kayentis join forces to deliver an integrated and cost-efficient approach to remote monitoring of patients in clinical trials

kayentis · Thursday, October 25th, 2018

We are proud to announce our collaborative work with OMRON Healthcare on the development of an integrated and cost-efficient approach to remote monitoring of patients in clinical trials.

Combining the latest technology in connected devices from OMRON and the benefits of Kayentis' advanced eCOA solutions, we have successfully developed an Integrated Electronic Data Service. This new and more economical approach will allow for higher patient engagement and retention, more and higher quality of patient data, and faster results. OMRON and Kayentis, each with their specialized expertise in the development of medical devices and applications as well as client services and experiences, are in a uniquely strong position where together they can tackle many of the challenges that come with the collection of patient data.

About Kayentis

Kayentis is a global provider of electronic Clinical Outcome Assessment (eCOA) solutions for patient data collection in clinical trials. Created in 2003, Kayentis has specialized in eCOA solutions since 2009, developing a full range of services and extending its solutions portfolio to support pharmaceutical companies, biotechnology companies and CROs. Today, with experience of more than 150 clinical trials in 75+ countries (6,500 sites and 50,000 patients) and in a broad range of therapeutic areas, Kayentis adds value to data quality and clinical trial efficiency with innovative and intuitive solutions.
