Improving patients' experience using Kayentis unified platform and implementing robust technology integration.

- Visiting sites remotely
- Receiving study information and support
 - Providing study experience feedback
 - Accessing additional systems
 - Getting an appropriate back-up option
- Completing questionnaires according to patients needs

Improving patients' experience using Kayentis' unified platform and implementing robust technology integration

Visiting sites remotely

Remote visits happen via a simple televisit accessible through the eCOA app

Receiving study information and support

Training and study resources (pdf/videos) are directly accessible via the same device

KAYENTIS' SINGLE PATIENT-CENTRIC

Completing questionnaires

according to patients needs

Patients can complete all relevant

questionnaires via the most suitable data

collection mode using the same credentials:

provisioned device, BYOD, interview

Getting an appropriate back-up option

A suitable data collection back-up plan can be selected according to the patient population and project specificities : WebCOA, interview mode, spare device

PLATFORM

Providing study experience feedback

Participant Feedback Questionnaire is accessible directly via the eCOA app

Accessing additional systems

Open platform for multi-level system integration, to allow patients to access other services according to project needs (e.g. eConsent, patient transportation, medication adherence, wearables)
