

Collecting ePRO & eObsRO data via interview mode can be recommended in specific circumstances, according to the medical conditions, operational situations, or study design specificities. Discover the key advantages of the Kayentis interview mode:

Interview mode: a valuable data collection alternative supporting Decentralized Clinical Trials

Collecting ePRO & eObsRO data via interview mode can be recommended in specific circumstances

MEDICAL CONDITIONS

The patient's vision is altered by the pathology (eg, macular degeneration, diabetic retinopathy)

The patient is physically unable to complete questionnaires (eg, multiple sclerosis, rheumatoid arthritis)

OPERATIONAL SITUATIONS

The patient's computer is broken so questionnaire self-completion is impossible

The patient cannot come to the site (eg, pandemic, disabled patient)

STUDY DESIGN SPECIFICITIES

The study has an extended follow-up phase with only a small number of questionnaires

The study has ObsROs, and the observer does not feel comfortable with completing the ObsRO (eg, an elderly observer lacking technological skills, a very emotional parent)

Kayentis interview mode

- ✓ A valuable **ePRO back-up** alternative
- ✓ Increases **data collection**
- ✓ **Useful** in several situations driven by medical condition, operational model or study design
- ✓ Provides **flexibility to users**
- ✓ Supports **Decentralized Clinical Trials**
