

# DECENTRALIZED CLINICAL TRIALS

## Using Kayentis' unified platform for an enhanced patient experience

### Improving patients' experience using Kayentis' unified platform and implementing robust technology integration

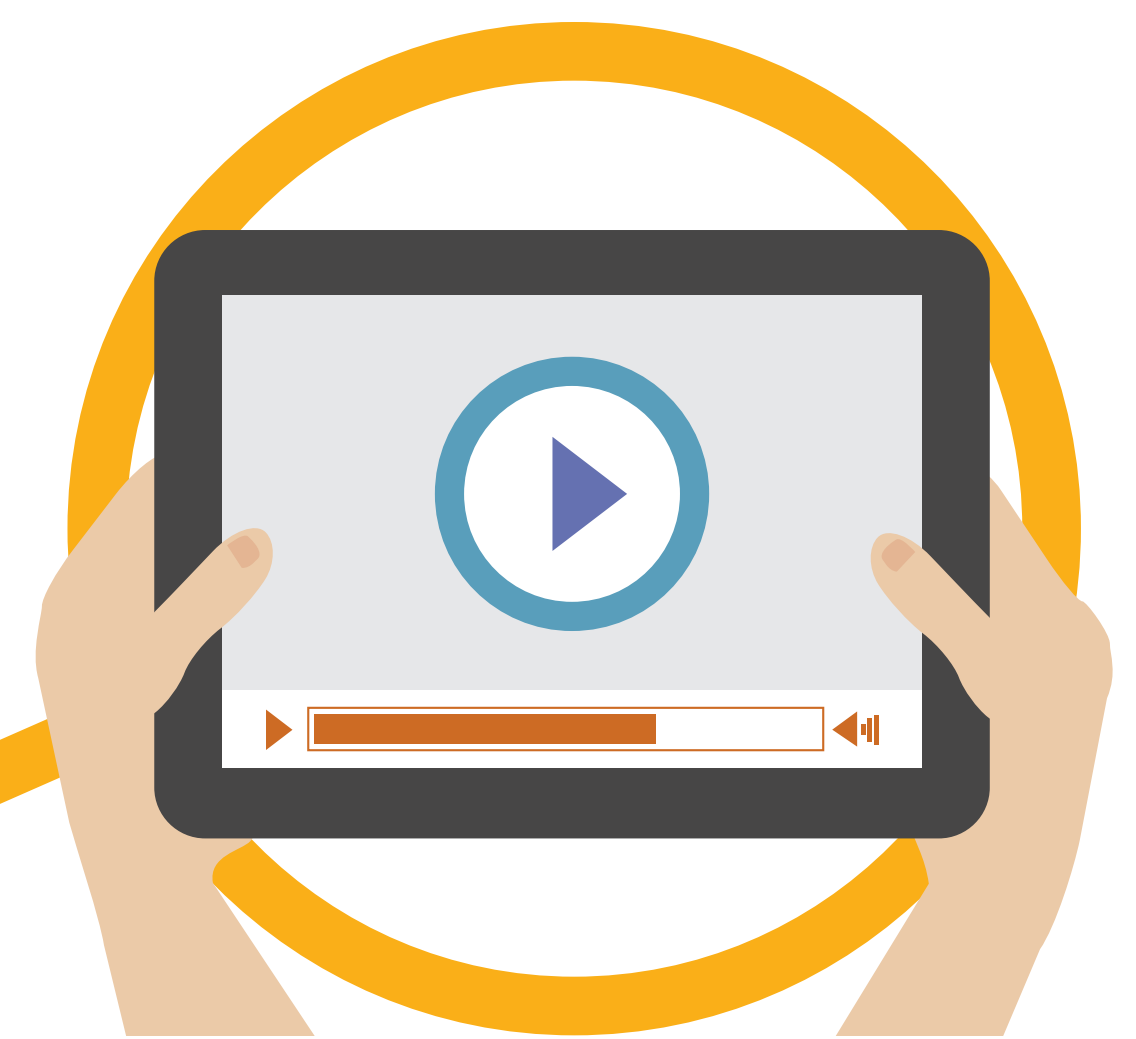

#### Visiting sites remotely

Remote visits happen via a simple televisit accessible through the eCOA app

#### Receiving study information and support

Training and study resources (pdf/videos) are directly accessible via the same device

#### Completing questionnaires according to patients needs

Patients can complete all relevant questionnaires via the most suitable data collection mode using the same credentials: provisioned device, BYOD, interview

### KAYENTIS' SINGLE PATIENT-CENTRIC PLATFORM

#### Providing study experience feedback

Participant Feedback Questionnaire is accessible directly via the eCOA app

#### Getting an appropriate back-up option

A suitable data collection back-up plan can be selected according to the patient population and project specificities : WebCOA, interview mode, spare device

#### Accessing additional systems

Open platform for multi-level system integration, to allow patients to access other services according to project needs (e.g. eConsent, patient transportation, medication adherence, wearables)
