

Kayentis

Dedicated to eCOA and patient engagement

#10 eCOA COMMITMENT: What about using an eICF in your trial with Kayentis?

kayentis · Sunday, December 4th, 2016

Because Kayentis has the MOST INTEGRATED solution with SecureConsent® eICF,

We have the most integrated solution - SecureConsent® eICF:

- One single tablet for both solutions.
- The choice of the Android operating system makes it very robust and easy to maintain, and upgrades are controlled.
- Kayentis tablets have worldwide 3G capacity based on an alliance with SFR/Vodafone; this ensures the SecureConsent online solution operates reliably regardless of Wifi availability.
- Logistics is shared and managed by Kayentis.
- Tier 1 support is managed by Kayentis.

AND COMING SOON...

- SecureConsent® training will be performed by Kayentis;
- Deeper integration - SecureConsent key information will be available in Clin'Form, allowing DM activities to be performed by the Kayentis team (eg reconciliation of the subject number with the randomization tool);
- Single sign-on for the sites;
- Joint archiving procedures.
