KAYENTIS is looking for a Clinical **Project Manager for clinical studies in running mode**. This permanent role is based in **Boston, MA (USA)**.

You will be reporting to the Project Management Manager.

Mission:

The Clinical Project Manager is in charge of the following activities:

- Follow up of the sites during the use of our solution
- Functional and logistical support of the actors (Sponsor, CRO, Sites, etc.)
- Production of Risk Based Monitoring reports

- Implements the Logistics/support actions necessary for the opening of the sites
- Pilots the resolution of the actions to be carried out on running projects and provides feedback during regular points with the sponsor or through the channels set up with the users (helpdesk, email, etc.)
- Maintains regular contacts with the client (meetings & Regular calls)
- Interacts with the outsourced helpdesk
- Relays customer needs to internal teams
- Proactively monitors the key elements of the study and anticipates key actions to be launched with the client in the running phase
- Risk-Based monitoring
- Ensures the transfer of important information to the various internal project actors (account governance manager, implementation project manager ...)

Experience / Qualifications:

Bachelor's or Master's degree in Initial Training clinical research associate and 2 years of experience, Data Manager, head of PProClinical Jet or Pharmacist

Good organizational skills, ability to manage priorities, resistance to pressure and excellent relationship, team spirit

Strong ability to be flexible and adapt to change, to work independently with autonomy, and proven ability to establish collaborative working relationships in a multi-disciplinary remote team environment.

Effective verbal and written communication in English (French would be a plus).

Preferably experience in clinical studies including eCOA questionnaires.
