## Azure Cloud Engineer - Grenoble

Our solution provides our customers with a hosted application in a hybrid cloud environment.

To assist in the implementation of the Azure Cloud environment, we are looking for a IT Engineer Cloud Azure

This permanent position is based in the IT team near Grenoble (Meylan, France).

### YOUR ROLE:

- ✓ The mission of the IT team (6 people) is to work in collaboration with the various Kayentis teams (operational teams, quality department, etc.) and the R&D team in order to provide the greatest stability and offer innovative hosting solutions in the regulated context of clinical studies.
- ✓ Reporting to the IT team, the IT Cloud / Hybrid Administrator has the following mission
  - He/she oversees the implementation, administration and maintenance of the Cloud infrastructure (Azure) and Hybrid platform hardware (servers, IT and network equipment, etc.) and software (internal tools, operating systems, etc.).
  - He/she is the driving force behind the design of the general organization and the evolution of the information system according to the company's needs and technological opportunities.
  - He/she intervenes in production incidents and does everything possible to ensure a rapid resolution.

- He/she ensures that the IT equipment is secure and that the instructions and good practices of IT security are respected.
- He/she is responsible for the respect of the KPIs of the Cloud infrastructure, and is in charge of the implementation of problem management actions.
- He/she implements changes to the hybrid and Cloud infrastructure.
- He/she also intervenes on an ad hoc basis to ensure the implementation of IT resources made available to Kayentis and similar employees.

#### **YOUR PROFILE:**

- ✓ With a higher education (BAC +5) technical background, you have significant experience in the administration, architecture of Azure resources and traditional and local hosting, as well as in software implementation using Azure PaaS and IaaS services, Git, Terraform or equivalent.
- ✓ Experience with scripting development is required. Knowledge of Powershell and to a lesser extent Python is desired.
- ✓ Knowledge of DevOPS processes is desired
- ✓ Your curiosity leads you to keep an eye on technology, particularly about Microsoft's Azure offering.
- ✓ You like to work in a team and are autonomous and reactive.
- ✓ Technical English required. General fluency in English is appreciated.
- ✓ Organizational and interpersonal skills are required.
