

# How Kayentis helps you manage the growing complexities of eCOA trials?

Global eCOA & DCT provider

# Complexity #1

## Strict protocol requirements

*Kayentis' eCOA solution is highly flexible to meet protocol requirements:*

✓ **YOUR VISIT SCHEDULING IS CHANGING OVER TIME?**

Our powerful programming will ensure that patients are routed to the right questionnaire at the right time.

✓ **YOUR DESIGN INVOLVES A MIX OF ON-SITE AND AT-HOME VISITS?**

No problem. Triggers will guarantee that ePROs open in the appropriate mode ('home eDiary' or 'on site' mode) at the right time.

✓ **THE SITE STAFF NEED TO SPEAK TO THE PATIENT BEFORE NEXT VISIT?**

Our televisit option embedded in the eCOA app allows study patients and study doctors to connect as necessary.

✓ **YOUR STUDY IS LENGTHY?**

Our patient engagement tools maintain patient compliance over time.

e.g., eDiary and ePRO data collection customizable reminders, medication adherence reminders\*, Kayentis Media Player to share study information and provide training refreshers, patient transportation\*, patient portal\*.

\*available via  ClinOne partnership

✓ **YOUR STUDY INVOLVES CAREGIVERS?**

When caregivers are involved, they can complete their ObsRO assessments using their own credential on the same device as the patients. Caregivers can also use their own smartphone in a BYOD mode.

## Complexity #2

# Specific and varying patient population needs

*We develop and implement customized eDiaries to ensure accurate data capture in all circumstances:*

✓ **YOU HAVE MULTIPLE STUDY PARTICIPANTS WITH VARYING PREFERENCES?**

We propose multiple data entry modes and back-up options for a flexible approach (provisioned device, BYOD, remote interview mode, WebCOA), all of which are available using the same credentials.

✓ **YOUR STUDY INVOLVES YOUNG CHILDREN?**

We can develop specific questionnaires with emojis or animated characters.

✓ **YOUR STUDY IS MULTI-COUNTRY?**

We can create drop-down lists with medication names according to the location.

✓ **YOU NEED YOUR PATIENT TO LOCALIZE THEIR PAIN SYMPTOMS PRECISELY?**

Our simple and user-friendly body maps allow patients to respond accurately.

✓ **YOU NEED TO TRACK CONCOMITANT MEDICATION?**

We can design appropriate eDiaries that will allow patients to report their concomitant medication intake on a daily basis (or more often, if needed!).

# Complexity #3

# Integrating data from multiple sources

*We have an interoperable platform able to connect with multiple external systems:*

## ✓ YOU HAVE OPTED FOR AN eCONSENT SOLUTION?

We simplify your experience by proposing an eConsent\* app embedded in our eCOA device for consent versioning and re-consent management.

\*available via  ClinOne partnership  
CONNECT. INSURE. EMPOWER.

## ✓ YOU WANT TO INTEGRATE INTERACTIVE RESPONSE TECHNOLOGY (IRT) DATA?

Our solution connects to numerous **IRT systems for data synchronization**: patient number creation, patient randomization...

## ✓ YOUR PROTOCOL REQUIRES COMPLEX SCORE CALCULATIONS?

- Our experienced team programs and tests every type of score.
- Our solution interconnects with numerous external systems such as Quality Metrics for SF-36/SF-12 score calculation.

## ✓ THE MEDICAL INDICATION OF YOUR STUDY REQUIRES DATA FROM WEARABLES?

Our platform is open to integration with various medical devices.

# Kayentis, global eCOA & DCT provider

## Broad experience...

Since  
**2005**  
eCOA expert

**300+**  
clinical trials  
phase I-IV

**20**  
different  
therapeutic  
areas

## ...in a wide range of study types

From **15** patients  
in an early phase trial to  
**+10,000**  
in a late-phase study

From local to  
global studies  
**100%**  
of countries covered

Studies lasting  
**up to 10**  
years

## ...with strong scientific and operational support

**Clinical &  
Scientific**  
dedicated team to  
support your study

**Operational  
capabilities**  
USA - Europe - Asia

**24/7**  
HELPDESK
