

Kayentis Carbon Neutral Program for eCOA Projects

Reduce CO₂ emissions in clinical trials without impacting cost, quality, or timelines

Carbon footprint evaluation

Assess CO₂ emissions (scope 1, 2, & 3) from device production, shipping, and project management travel

Solutions to limit emissions

Eco-friendly device strategy

- BYOD hybrid strategy
- WebCOA or Interview mode back-up
- Refurbished devices/cross-patient reuse

Optimized shipping

- Smallest possible shipment boxes
- Recyclable cardboard
- Country-level shipments

Virtual support for patients & sites

- Telemedicine app for study visits
- Kayentis Media Player for training modules and resources

CO₂ emission offset

- Offset residual emissions via donations to GoodPlanet Foundation's carbon solidarity action program to support sustainable alternatives benefiting disadvantaged groups

Choose Kayentis and reduce your carbon footprint

Kayentis is committed to sustainability and supports the pharma community's environmental ambitions

Since 2020, a Carbon Neutral Program is in place for all eCOA Projects
